SOFTWARE DEVELOPER | FULL STACK DEVELOPER | BACKEND DEVELOPER

PROFESSIONAL SUMMARY

- Backend-focused full stack developer with **3+ years of hands-on experience** across internships, a remote consulting role, and academic team projects, building REST APIs, database-driven features, and web applications.
- Work daily with **Node.js, Express.js, React, Next.js, PostgreSQL, and MongoDB**; have also built projects in Java, C#/.NET, and Swift.
- Delivered **20+ REST API endpoints** and automated tests across professional roles, improving selected API and database operations by **13–15%** through query and data-model optimization; led a **3-person Agile team** on the RewardsX capstone.

TECHNICAL SKILLS

- **Backend Development:** Node.js, Express.js, REST APIs, JavaScript, TypeScript, SQL, input validation (Zod), error handling, third-party API integrations, Swagger UI
- **Frontend Development:** React, Next.js, HTML5, CSS3, Sass, responsive design, reusable components
- **Java and Other Platforms:** Java 21, JavaFX, Maven, Spring Boot, Android (Java), C#, .NET 8, WinForms, Swift, UIKit
- **Databases:** PostgreSQL, MongoDB, MySQL, SQLite, SQL Server, Firebase, schema design, parameterized queries
- **Testing and Security:** Jest, Supertest, unit and API testing, JWT authentication, bcrypt, CSRF protection, rate limiting
- **Tools and Delivery:** Git, GitHub, Docker, Vercel, Render, Postman, Agile, Scrum, code reviews, API documentation

PROFESSIONAL EXPERIENCE

Backend & Web Developer — Consultant (Contract)

Void Enterprise Inc. — Greater Toronto Area, ON, Canada | Sep 2025–Present | Remote

- Build and maintain **6+ REST API endpoints** and backend services with Node.js and JavaScript for client web applications.
- Develop web application features and pages using **React and Next.js**.
- Design **MongoDB data models** and write queries to support application features.
- Write and maintain **20+ unit and integration tests**, and collaborate remotely through Git-based workflows; debug issues and document work for clients and teammates.

Full Stack Developer & Team Lead — Capstone Project

Credits Financial Inc. × Humber Polytechnic (RewardsX) — Toronto, ON, Canada | May 2025–Aug 2025

- Led a **3-person Agile team** (“Agile ACEs”) through sprint planning, task assignment, and code reviews.
- Designed the **backend architecture and PostgreSQL schema**, and built **8+ REST API endpoints** and full-stack features with Node.js and React.
- Integrated **Google Places, Yelp, Mapbox, and OpenStreetMap** APIs to power location-based features.
- Reduced average API response time by **18%** through query refactoring, response caching, and data-model improvements; documented endpoints with **Swagger UI**.

Software Engineer Intern

Void Enterprise Inc. — Greater Toronto Area, ON, Canada | Jul 2024–Feb 2025 | Remote

- Built responsive websites and front-end features using **JavaScript and React**.
- Developed **6+ REST API endpoints** connecting front-end pages to backend data, across **six Agile sprint cycles**.
- Maintained **PostgreSQL** databases, writing queries and supporting data-related features.
- Diagnosed and resolved **8+ defects** across client projects and wrote **unit tests with Jest** to catch issues before release.

Web Developer Intern

KashCandi Technology Solutions — Vadodara, India | Feb 2022-Jul 2023 | Alongside B.E. studies

- Contributed to **three web applications**, building pages and UI components with **HTML, CSS, JavaScript, and React**.
- Worked with **MySQL** databases to store and retrieve application data.
- Tested features manually, fixed bugs, and used Git and GitHub for version control.

SELECTED PROJECTS

Interview Master — AI Interview Prep Platform (Live)

Node.js | Express | MongoDB | React | Gemini API | Docker

- Built a full-stack app that turns a job description and resume into a match score, interview questions with model answers, a skill-gap analysis, and a tailored ATS-friendly resume PDF.
- Constrained Gemini output with **Zod schemas**; secured the API with **JWT in httpOnly cookies, CSRF tokens, bcrypt, and per-IP rate limiting**, with server-side token revocation on logout.
- Wrote backend tests with **Jest and Supertest**; deployed the API on Render with Docker and the frontend on Vercel.

Your Own Theater — Team Lead

JavaScript | HTML | CSS | TMDB API | Render

- Led a **team of four** building a movie web app with watchlists, favourites, and ratings, integrated with the TMDB API and its authentication.
- Worked full stack as team lead, coordinating UI/UX, frontend, and backend work; deployed the app on Render.

Healthcare Appointment Management System

Java 21 | JavaFX | SQLite | JDBC | Maven

- Built a JavaFX application for patient and appointment management with login, dashboard, full CRUD, record export, and **6+ database operations**.
- Used embedded SQLite via JDBC with **parameterized queries**, and ran database work on an **ExecutorService** thread pool to keep the UI responsive.

EDUCATION

Postgraduate Certificate in Information Technology Solutions — Dean's Honours List

Humber Polytechnic — Toronto, ON, Canada | Jan 2024-Aug 2025 | Part-Time | GPA: 3.50/4.00

Bachelor of Engineering in Computer Engineering

Gujarat Technological University — Gujarat, India | Jul 2019-Jul 2023 | CGPA: 8.0/10

Certifications: AWS Certified Cloud Practitioner; Microsoft AI Fundamentals; LinkedIn Learning: GitHub Copilot AI Pair Programming, Node.js, React.js, TypeScript, and REST APIs

LEADERSHIP & VOLUNTEER

- **Peer Mentor, Humber Polytechnic:** supported new students with academic guidance, coursework planning, and the transition into college life.
- **Promotion Coordinator, PRAKARSH 2022 (SVIT tech fest):** led and coordinated **10+ promotion teams** across multiple districts to run event campaigns.
- **Crew Member, MECIA HACK 2023 (hackathon):** managed registrations, technical setup, and event-day operations.
