Professional Summary

Full Stack Engineer with 3+ years of experience building scalable backend systems and production web applications using Node.js (Express / NestJS), TypeScript, React, Next.js, PostgreSQL, and MongoDB. Specialized in RESTful API design, microservices architecture, OAuth 2.0 / JWT authentication, and OWASP-aligned secure coding practices — with a track record of delivering end-to-end features in fast-paced Agile/Scrum environments. Postgraduate Certificate from Humber Polytechnic (Dean's Honours List — all semesters). Open to full-time Software Engineer roles across Canada.

Experience

Full Stack Engineer — Void Enterprise — Sept 2025 – Present (Remote, Greater Toronto Area, Canada)

- Designed and developed scalable RESTful APIs using **Node.js (Express / NestJS patterns)**, powering core business logic across independently deployable microservices
- Implemented **OAuth 2.0 and JWT-based authentication** with role-based authorization across microservice boundaries, following OWASP secure coding standards
- Built and maintained **PostgreSQL** databases including schema design, query optimization, and data modeling; improved query performance by resolving N+1 and slow-scan bottlenecks
- Wrote **unit and integration tests** for backend API endpoints, ensuring reliability and regression coverage across service boundaries
- Documented all service APIs using **Swagger UI**, enabling clear service contracts and accelerating developer onboarding
- Architected microservice-based backend systems with loose coupling and independent deployability; containerized services using **Docker** for consistent local and cloud deployments

Full Stack Developer — RewardsX — May 2025 – Aug 2025 (Remote, Vancouver, Canada)

- Led a team of 3 developers delivering full-stack features using **React, Next.js, Node.js, TypeScript, MongoDB, and PostgreSQL**
- Designed and implemented scalable **RESTful APIs** with third-party integrations; drove backend performance optimization through query refactoring, API response caching, and efficient data modeling
- Authored API-level and integration tests using **Jest**, increasing test coverage and reducing production regressions
- Managed **CI/CD pipelines via GitHub Actions**, participating in code reviews and resolving production issues under time pressure
- Collaborated cross-functionally in an **Agile/Scrum** environment, estimating effort, planning sprints, and delivering feature enhancements aligned with business requirements end-to-end

Software Developer Intern — Void Enterprise — July 2024 – Feb 2025 (Remote, Greater Toronto Area, Canada)

- Developed and maintained backend APIs with **Node.js and Express**, contributing to microservices architecture and async communication patterns
- Optimized **PostgreSQL** queries and schema structures to support reliable data persistence and improved application performance
- Assisted in maintaining **Swagger UI** API documentation across the codebase, ensuring consistent endpoint specifications
- Participated in sprint-based Agile/Scrum delivery cycles, shipping backend features for client-facing products end-to-end
- Contributed to containerization workflows using **Docker**, supporting consistent service deployment across environments

Software Developer — Kashcandi Technology Solutions — Feb 2022 – Aug 2023 India

- Developed and maintained full-stack web applications using **React, Node.js, JavaScript, HTML, and CSS**
- Built and consumed **RESTful APIs** supporting backend business logic and third-party service integrations
- Optimized frontend performance through component refactoring and state management improvements
- Ensured code quality, unit testing, and adherence to SDLC best practices throughout the development lifecycle

Education

Post Graduate Certificate — Information Technology Solutions *Humber Polytechnic | Toronto, ON, Canada | Jan 2024 – Aug 2025* GPA: 3.50 / 4.0 | Dean's Honours List — All Semesters

Skills

Backend & API Development: Node.js, Express.js, NestJS, REST APIs, Microservices Architecture, Swagger UI / OpenAPI, JWT, OAuth 2.0 / OIDC, FastAPI, Laravel
Frontend Development: React, Next.js, TypeScript, JavaScript, HTML5, CSS3, Tailwind CSS, Bootstrap
Databases: PostgreSQL, MongoDB, MySQL, Firebase Firestore, Redis (basic), enterprise relational databases (DB2-compatible environments)
Cloud & DevOps: Docker, Kubernetes (familiar), AWS (EC2, S3), Vercel, Render, Firebase, Android (Kotlin), iOS (SwiftUI)
Languages: JavaScript, TypeScript, Python (FastAPI), Java, SQL, PHP
Tools: Git, GitHub, Postman, VS Code, CI/CD, GitHub Actions, GitHub Copilot, Linux
Concepts: OOP, MVC, System Design, OWASP Secure Coding, Authentication & Authorization, Unit & Integration Testing, Agile/Scrum, SDLC, Performance Optimization, Technical Documentation, Change Management

Projects

EventHub Platform — *Node.js, NestJS-style architecture, MongoDB, JWT / OAuth 2.0*

- Designed and built secure REST APIs with **JWT / OAuth 2.0** authentication and role-based authorization following OWASP input validation practices
- Engineered event booking system with capacity validation, data consistency checks, and production-style error handling
- Wrote unit and integration tests for API endpoints ensuring reliability under concurrent booking scenarios
- Managed image uploads, protected routes, and structured API documentation in a production-style backend environment

Your Own Theater (YOT) — *React, Next.js, TypeScript, TMDB API, MongoDB*

- Built a responsive movie platform with watchlists, favorites, and ratings using Next.js SSR for SEO optimization
- Integrated TMDB API and optimized backend data flow and application performance
- Deployed on Render: yourowntheater.onrender.com

Cafe Management System — *C# (.NET 8), WinForms, SQL Server, ADO.NET*

- Built a desktop application for café operations with role-based access (Admin/Guest), parameterized SQL queries preventing SQL injection, and modular UserControl architecture
- github.com/HetShah24-06/cafe-management-dotnet

Budget Tracking System — *Laravel, PHP, MySQL*

- Developed an expense management system with authentication, role-based access, analytics dashboard, and PDF/CSV export functionality
-

Certifications

- Microsoft AI Fundamentals — Microsoft & LinkedIn
 - JavaScript Essential Training — LinkedIn Learning
 - React.js Essential Training — LinkedIn Learning
 - Node.js Essential Training — LinkedIn Learning
 - TypeScript Essential Training — LinkedIn Learning
 - REST APIs & Web Services — LinkedIn Learning
 - Git & GitHub for Developers — LinkedIn Learning
-

Leadership & Volunteer Experience

Peer Mentor — *Humber Polytechnic*

- Supported new students with academic guidance, campus resources, and transition into college life
- Assisted peers with coursework planning and basic technical problem-solving

Promotion Coordinator — *PRAKARSH 2022*

- Led and coordinated **10+ promotion teams across multiple districts** to execute college event campaigns
- Planned outreach strategies, tracked engagement, and ensured targets were met within timelines

Crew Member — *MECIA HACK 2023*

- Helped manage registrations, technical setup, and event operations for a hackathon
- Collaborated with organizers to ensure smooth execution of activities
