Professional Summary

Full Stack Engineer with 3+ years of experience building scalable backend systems and production web applications using Node.js, Express.js, PostgreSQL, MongoDB, React, and Next.js. Specialized in RESTful API design, microservices architecture, and database optimization — with a track record of delivering end-to-end features in fast-paced agile environments. Currently architecting backend systems at Void Enterprise. Postgraduate Certificate from Humber Polytechnic (Dean's Honours List — all semesters). Open to full-time Software Engineer roles across Canada.

Experience

Full Stack Engineer **Void Enterprise** **Sept 2025 – Present** (Remote, Greater Toronto Area, Canada)

- Designed and developed scalable RESTful APIs using **Node.js and Express**, powering core business logic across microservices
- Built and maintained **PostgreSQL** databases including schema design, query optimization, and data modeling for production systems
- Documented APIs using **Swagger UI**, enabling clear service contracts and improving developer onboarding experience
- Architected **microservice-based backend systems** ensuring loose coupling and independent deployability across services
- Integrated **Next.js** frontend with backend APIs, owning the full feature lifecycle from database to UI

Full Stack Developer **RewardsX** **May 2025 – Aug 2025** (Remote, Vancouver, Canada)

- Led a team of 3 developers delivering full-stack features using **React, Next.js, Node.js, TypeScript, MongoDB and PostgreSQL**
- Designed and implemented scalable **RESTful APIs**, third-party integrations, and backend performance optimizations
- Improved application performance through query optimization, API refactoring, and efficient component design
- Worked with **Git, Postman, and CI/CD pipelines**, participating in code reviews and production issue resolution
- Collaborated cross-functionally in an **Agile/Scrum** environment, delivering feature enhancements aligned with business requirements

software Developer - Intern **Void Enterprise** **July 2024 – Feb 2025** (Remote, Greater Toronto Area, Canada)

- Developed backend APIs with **Node.js and Express** as part of an agile team delivering custom software solutions
- Worked with **PostgreSQL** to write and optimize queries supporting reliable data persistence across application features
- Contributed to **microservices architecture**, learning distributed system patterns under senior engineer guidance
- Assisted in API documentation using **Swagger UI**, maintaining consistent endpoint specs across the codebase
- Collaborated in sprint-based delivery cycles, shipping backend features for client-facing products end-to-end

Software Developer **Kashcandi Technology Solutions** **Feb 2022 – Aug 2023** India

- Developed and maintained full stack web applications using **React, JavaScript, Node.js, HTML, and CSS**
- Built and consumed **RESTful APIs** supporting backend business logic and third-party service integrations
- Integrated REST APIs and ensured accurate frontend-backend data flow
- Improved frontend performance through component refactoring and optimized state management
- Ensured code quality, testing, and adherence to best practices during the development lifecycle

Education

Post Graduate Certificate — Information Technology Solutions **Humber Polytechnic** **Jan 2024 – Aug 2025** Toronto, ON, Canada **GPA: 3.50 / 4.0**

Skills

Backend Development: Node.js, Express.js, REST APIs, Microservices Architecture, Swagger UI, JWT Authentication, FastAPI, Laravel (basic CRUD)

Frontend Development: React, Next.js, JavaScript, TypeScript, HTML5, CSS3, Tailwind CSS, Bootstrap

Databases: MongoDB, PostgreSQL, MySQL, Firebase Firestore

Mobile & Cloud: Android (Kotlin), iOS (SwiftUI), Firebase, AWS (EC2, S3 – basic), Docker (basic), Vercel, Render

Languages: JavaScript, TypeScript, Java (Spring Boot – basic), Python (basic), SQL

Tools: Git, GitHub, Postman, VS Code, CI/CD, GitHub Actions, GitHub Copilot

Concepts: OOP, MVC, RESTful APIs, Authentication & Authorization, Agile/Scrum, SDLC, Performance Optimization, Responsive Design

Projects

Your Own Theater (YOT)

React, Next.js, TypeScript, TMDB API, MongoDB

- Built a responsive movie platform with watchlists, favorites, and ratings
- Integrated TMDB API and optimized application performance
- Deployed on Render: <https://yourowntheater.onrender.com/>

EventHub Platform

Next.js, Node.js, MongoDB, JWT

- Built secure REST APIs with JWT authentication and role-based authorization
- Designed event booking system with capacity validation and data consistency checks
- Implemented backend validation and error handling to ensure reliability
- Managed image uploads and protected routes in a production-style environment

Health Management System

Java, JavaFX, File I/O, MVC Architecture

- Developed a desktop-based healthcare management system with patient and appointment management using Java and JavaFX
- Applied MVC architecture for modular, maintainable code structure with interactive UI screens including dashboard and login panels
- Implemented data persistence using file handling, input validation, error handling, and structured data export
- Strengthened object-oriented programming and backend development skills through core Java application logic

Budget Tracking System

Laravel, PHP, MySQL

- Developed an expense management system with authentication and role-based access
- Implemented analytics, filtering, and PDF/CSV export functionality

Certifications

- Microsoft AI Fundamentals — Microsoft & LinkedIn
 - JavaScript Essential Training — LinkedIn Learning
 - React.js Essential Training — LinkedIn Learning
 - Node.js Essential Training — LinkedIn Learning
 - TypeScript Essential Training — LinkedIn Learning
 - REST APIs & Web Services — LinkedIn Learning
 - Git & GitHub for Developers — LinkedIn Learning
-

Leadership & Volunteer Experience

Peer Mentor

Humber Polytechnic

- Supported new students with academic guidance, campus resources, and transition into college life
- Assisted peers with coursework planning and basic technical problem-solving

Promotion Coordinator

PRAKARSH 2022

- Led and coordinated **10+ promotion teams across multiple districts** to execute college event campaigns
- Planned outreach strategies, tracked engagement, and ensured targets were met within timelines

Crew Member

MECIA HACK 2023

- Helped manage registrations, technical setup, and event operations
- Collaborated with organizers to ensure smooth execution of hackathon activities
